

PRESS RELEASE

CARLOTTA AWARD 3rd Edition 2025

<https://carlottaaward.weebly.com>

Prize to female researchers under 40

At the International Conference "FROM SEED TO PASTA-V" (FSTP-5)

Bari-Italy on 24th-27th September 2025

Deadline submission CV candidates 30/04/2025

ENEA is proud to announce the third edition of Carlotta Award 2025, together with the Accademia delle Scienze- detta dei XL - and Meetrofood-IT (Italian Research Infrastructure for Metrology and Open Access Data in support to the Agrifood).

In the world, the most important crops for producing food are wheat and other cereals. Today, more than ever, due to global climatic changes and insufficient global production, researchers are increasingly committed to select drought-tolerant, disease-resistant and contemporary highly productive cereals able to satisfy worldwide requests.

The prize, inspired to the figure of Carlotta Parisani Strampelli, wife and collaborator of the great Italian geneticist Nazzareno Strampelli, wants to give the right recognition to the female figure at service of the research with a positive signal to young female researchers engaged in the genetic improvement of wheat and other cereals.

The award will be held in the frame of the International Conference "FROM SEED TO PASTA-V" (FSTP-5) in Bari-Italy on 24th-27th September 2025, <https://www.fromseedtopasta.com> and is focused on the following themes:

- a) wheat genetics, genomics and breeding (2,3,4 and 5 sessions of FSTP-5)
- b) sustainable wheat production for security, food quality and safety, durum wheat-pasta value chain (1, 6 and 8 of sessions FSTP-5)

IMPORTANT INFORMATION: FSTP-5 registration fee reserved to the candidates of the CARLOTTA AWARD **remains at the cost of the early registration fee** along all the registration time
